

Specimen. This file shows the layout and the field list only. All values shown are placeholders for typesetting — they are not analytical results, not a classification, and not valid for any product or shipment. The document issued for your material is generated from the data for that lot.

Certificate of origin

1. Exporter	RSSE (full name and address as registered — specimen)
2. Consignee	
3. Notify party	
4. Country of origin	China
5. Country of destination	
6. Transport details	
7. Invoice number and date	
8. Marks and numbers	
9. Description of goods	Reference standards for laboratory use — individual compounds supplied in milligram and gram quantities, packed in amber glass vials. Not for human or veterinary use.
10. Quantity and packing	As stated on the invoice and packing list (specimen)
11. Harmonised system code	Specimen — the code is declared per shipment and is not fixed here
12. Declaration by the exporter	The undersigned declares that the goods described above originate in the country shown in box 4 and that the particulars given are correct. (Specimen wording.)

PLACE AND DATE OF ISSUE	AUTHORISED SIGNATURE	COMPANY STAMP

How this document is issued

Per shipment	A certificate of origin is issued for a specific shipment, against the invoice it accompanies. It is not issued per product or per lot.
What to quote	Quote the invoice number and the shipping country when you ask for it; those two are what the document is drawn against.
Chamber certification	Where the importing country requires a chamber of commerce or consular legalisation, tell us at the quotation stage — it changes the paperwork and the dispatch time.
